REQUIREMENT HTA/SI/R23/57: Verify existence and location of rocket or missile site in the area of Gliwice, Poland,

25X1C

REMARKS:

25X1D

 photography shows the existence of an installation which has the appearance of a conventional eight-gun antiaircraft position at the reported location of rocket or missile activity. This position, which is situated on the north side of the main highway leading northwest from Gliwice, consists of eight horseshoe-shaped revetments, unevenly spaced in a circular pattern, and a probable shed-type building. However, it is not possible to determine whether these positions are occupied, or to confirm any type of rocket activity, because of scale limitation of the oblique photography.
